Office Action Summary

Application No.

09/997,591

Applicant(s)

BERNDT, STEFAN

Examiner

Isaac M Woo

Art Unit

2172

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 28 November 2001.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 18 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-8 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Costa et al (U.S. Patent No. 6,138,121, hereinafter, "Costa").

With respect claim 1, Costa discloses, first interface (standard communication interface, col. 4, lines 36-40, fig. 1) to an application which initializes access to the data (111, data warehouse, fig. 1, col. 4, lines 35-59); and second interface to an access unit (ODBC, Open DataBase Connectivity) which provides access mechanisms for different databases, wherein the unit provides the application with appropriate data by accessing the access unit, see (col. 4, lines 35-67 to col. 5, lines 1-41). Costa discloses accessing different database, see (col. 4, lines 35-58). Costa does not explicitly disclose the accessing different "memory structures". However, the definition of database is "one or more large structured sets of persistent data, usually associated with software to update and query the data". This means that database is a memory to store data and each data

Art Unit: 2172

set has different data structure. Therefore, it would have been obvious to a person having ordinary skill in the art at the time of the invention was made to include accessing different "memory structures" in the system of the Costa. Because ODBS (Open DataBase Connectivity) is a standard and common interface to access different database.

With respect to claim 2, Costa discloses, application is produced on an object-oriented basis, and the data are provided in the form of required objects, see (col. 4, lines 10-34, event objects are retrieved).

With respect to claim 3, Costa discloses, third interface to a consistency module for automatically updating changed data in further applications accessing the same data, see (col. 8, lines 27-41).

With respect to claim 4, Costa discloses, the application runs on the first data processing device in which the data are stored, see (111, data warehouse, fig. 1, col. 4, lines 35-59).

With respect to claim 5, Costa discloses, second data processing device and the data are stored in the first data processing device, the first and second data processing devices being connected to one another via a network, see (col. 2, lines 22-59).

With respect to claim 6, Costa discloses, first data processing device is arranged in the first data processing device, see (111, data warehouse, fig. 1, col. 4, lines 35-59).

With respect to claim 7, Costa discloses, the first interface is used for connection to a network interface unit, see (col. 2, lines 22-59).

With respect to claim 8, Costa discloses, plurality of applications, each application has respectively associated application specific unit, see (col. 4, lines 35-67 to col. 5, lines 1-41).

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Bouix et al (U.S. Patent No. 5,297,193) discloses the system for integrated services digital public switching telephone network to which each fixed station is connected by a user to user signaling channel, service control points connected to the public switching telephone network and each having a wireless telephone service subscriber database and a call processing device, and a service management system having a reference database. The network is maintained on a centralized basis by transmitting a maintenance message from a fixed station to a service control point over

the user to user signaling channel in response to the fixed station detecting a fault, generating a maintenance ticket at the service control point, transmitting the maintenance ticket to the service control point, and storing the maintenance ticket in the database.

Contact Information

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Isaac M Woo whose telephone number is (703) 305-0081. The examiner can normally be reached on 8:00-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John E Breene can be reached on (703) 305-9790. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
